Company Profile

SINOPACK is a company affiliated to DingXin Glass Co and Weida Packing (China), which incorporate to provide customers from United States and American countries a more efficient, higher quality, enhanced and professional service.

DingXin Glass and Weida Packing both have more than 20 years of experience in the packaging industry, from production of glass bottles, plastic material, surface treatment to packaging, printing and other services, which offer customers one-stop OEM, ODM products.

Based on the professional experience from the past years, SINOPACK is going to provide our customers food, beverage and cosmetics packaging solutions and all kinds of quality products with professional design. With our domestic advantage, SINOPACK will achieve a more prompt and comprehensive service.

We look forward to working with you to create long term beneficial relationship and business opportunities !

COMPANY

YOUR ONE STOP NAIL POLISH PACKING SOLUTIONS

WeiDa Profile

Founded in 1992, Weida Cosmetic Packaging Industrial Co., Ltd. boasts a modern plant covering an area of 35,000 m², equipment worth US\$10 million and over 300 staff members. With over 20 years of industry experience, Weida provides clients across the world with one-stop-solution ranging from design and development, manufacturing, post-treatment to assembly and packaging.

Currently, the company has five workshops, fulfilling the full-process production control in mould development, injection moulding, hairbrush manufacturing, surface coating and multi-color printing.

Thanks to the concerted effort of our full staff, our highly efficient management model, our rigorous testing methodology, our solid product quality, as well as our excellent human resources configuration and demonstrated strength in mould R&D, this company, through its relentless endeavor over the years, has won the approval and patronage of many large big-name cosmetic manufacturers both domestic and overseas.

Upholding the principle of "Client Satisfaction As Our Goal, and Staff Satisfaction As Our Foundation", this company stresses on staff benefits and development, pursues a harmonious development for the enterprise and a win-win situation among clients, enterprise and staff.

Introduction to Workshops:

Mould Workshop - armed with a full-range mould developing equipment, our professional team has more than 12 years of experience in the development of plastic and glass mould, and in partnership with Weida's Technical Development Dept. It fulfills the complete technique process of mould design and manufacturing thus providing a high-quality OEM and ODM platform.

Injection Workshop - in strict adherence to the modern business standardization criteria and technique process planning and layout, this workshop currently has 60 high-capacity full-servo injection molding machines, three bi-color injection molding machines, aligned with industrial robot and automatic material refill system thus realizing the full automation of the injection workshop and enhancing the product stability.

Coating Workshop - as a 100k class purification workshop, this workshop currently has 3 domestic-leading surface processing lines for plastic parts, with over 500 meters in total length and single-day capacity of over 200 thousand pieces. A new production line for high-temperature bake-varnishing of glass bottles was added, with a single-day capacity of 150 thousand pieces.

Printing Workshop - it has 7 sophisticated automatic hot stamping machines, 7 semi-automatic stamping machines, 2 foil stamping machines with profile modeling, one tri-color printing machine, 3 automatic printing machines, 16 semi-automatic printing machines, 5 laser sculptors imported from Singapore and one automatic multi-color printing machines imported from France. The overall equipment is of world leading standard.

Hairbrush Workshop - professionally manufacturing nail varnish hairbrushes for over 10 years, it has 6 sophisticated Italian nail varnish brush production machines, with a daily brush output of 1 million pieces. At the end of 2014, a German-made automatic horizontal hair planting machine for nail varnish brushes, the most advanced equipment of the kind, was newly introduced, adding a daily output of 400 thousand pieces of high-quality hair brushes.

COMPANY

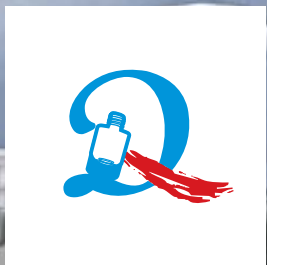

*TOP GRADE QUALITY,
IDEAL DESIGN*

DingXin Profile

Shandong Dingxin Electronic Glass Co., Ltd. is a manufacturer of glass containers, utensils molding, glass processing and other packaging materials. The company has 5 existing furnaces, 3 borosilicate glass furnace. Configure up to 56 production lines, with an annual capacity of 150,000 tons. The main scope of production of glass products are high-end cosmetics glass, household glass bottles, heat-resistant borosilicate glass (glass lamps, heat-resistant glassware) three main types.

For the raw materials of glass, we select high quality crystal white-sand material and Calcite, and its iron oxide content were controlled under 0.012 % and 0.015%, this is for the production of high-grade white crystalline material and high-white material glass products to provide strong protection.

In the melting process, we use the automatic furnace operation monitoring system, all-electric furnace production of 18-square meter workshop, enhanced clarity of molten glass, to ensure continuous and stable operation of the furnace. we are a standardized, systemized and uniformed manufacturer. extremely experienced in the industry. Strict on Quality Control to meet the extraordinary outcome. We do business with clients from U.S.A, Japan, Korea, Taiwan, Vietnam, Philippines, Russia, Canada, Europe and more countries. we are expanding globally and actively looking for more business partners.

Our company invested USD 2,000,000 in a brush workshop including EUR 1,200,000 for importing six sets of hair inserting machines, which are imported from Italy.

In 2011, the company invested USD 450,000 to develop the first automatic machines with Borghi Solutions to upgrade and improve the quality and efficiency of brush manufacturing in the brush industry of Italy. This machine can produce tens of thousands of painting brush.

There are two kinds of brushes in our company, nail painting brush and nail polish brush.

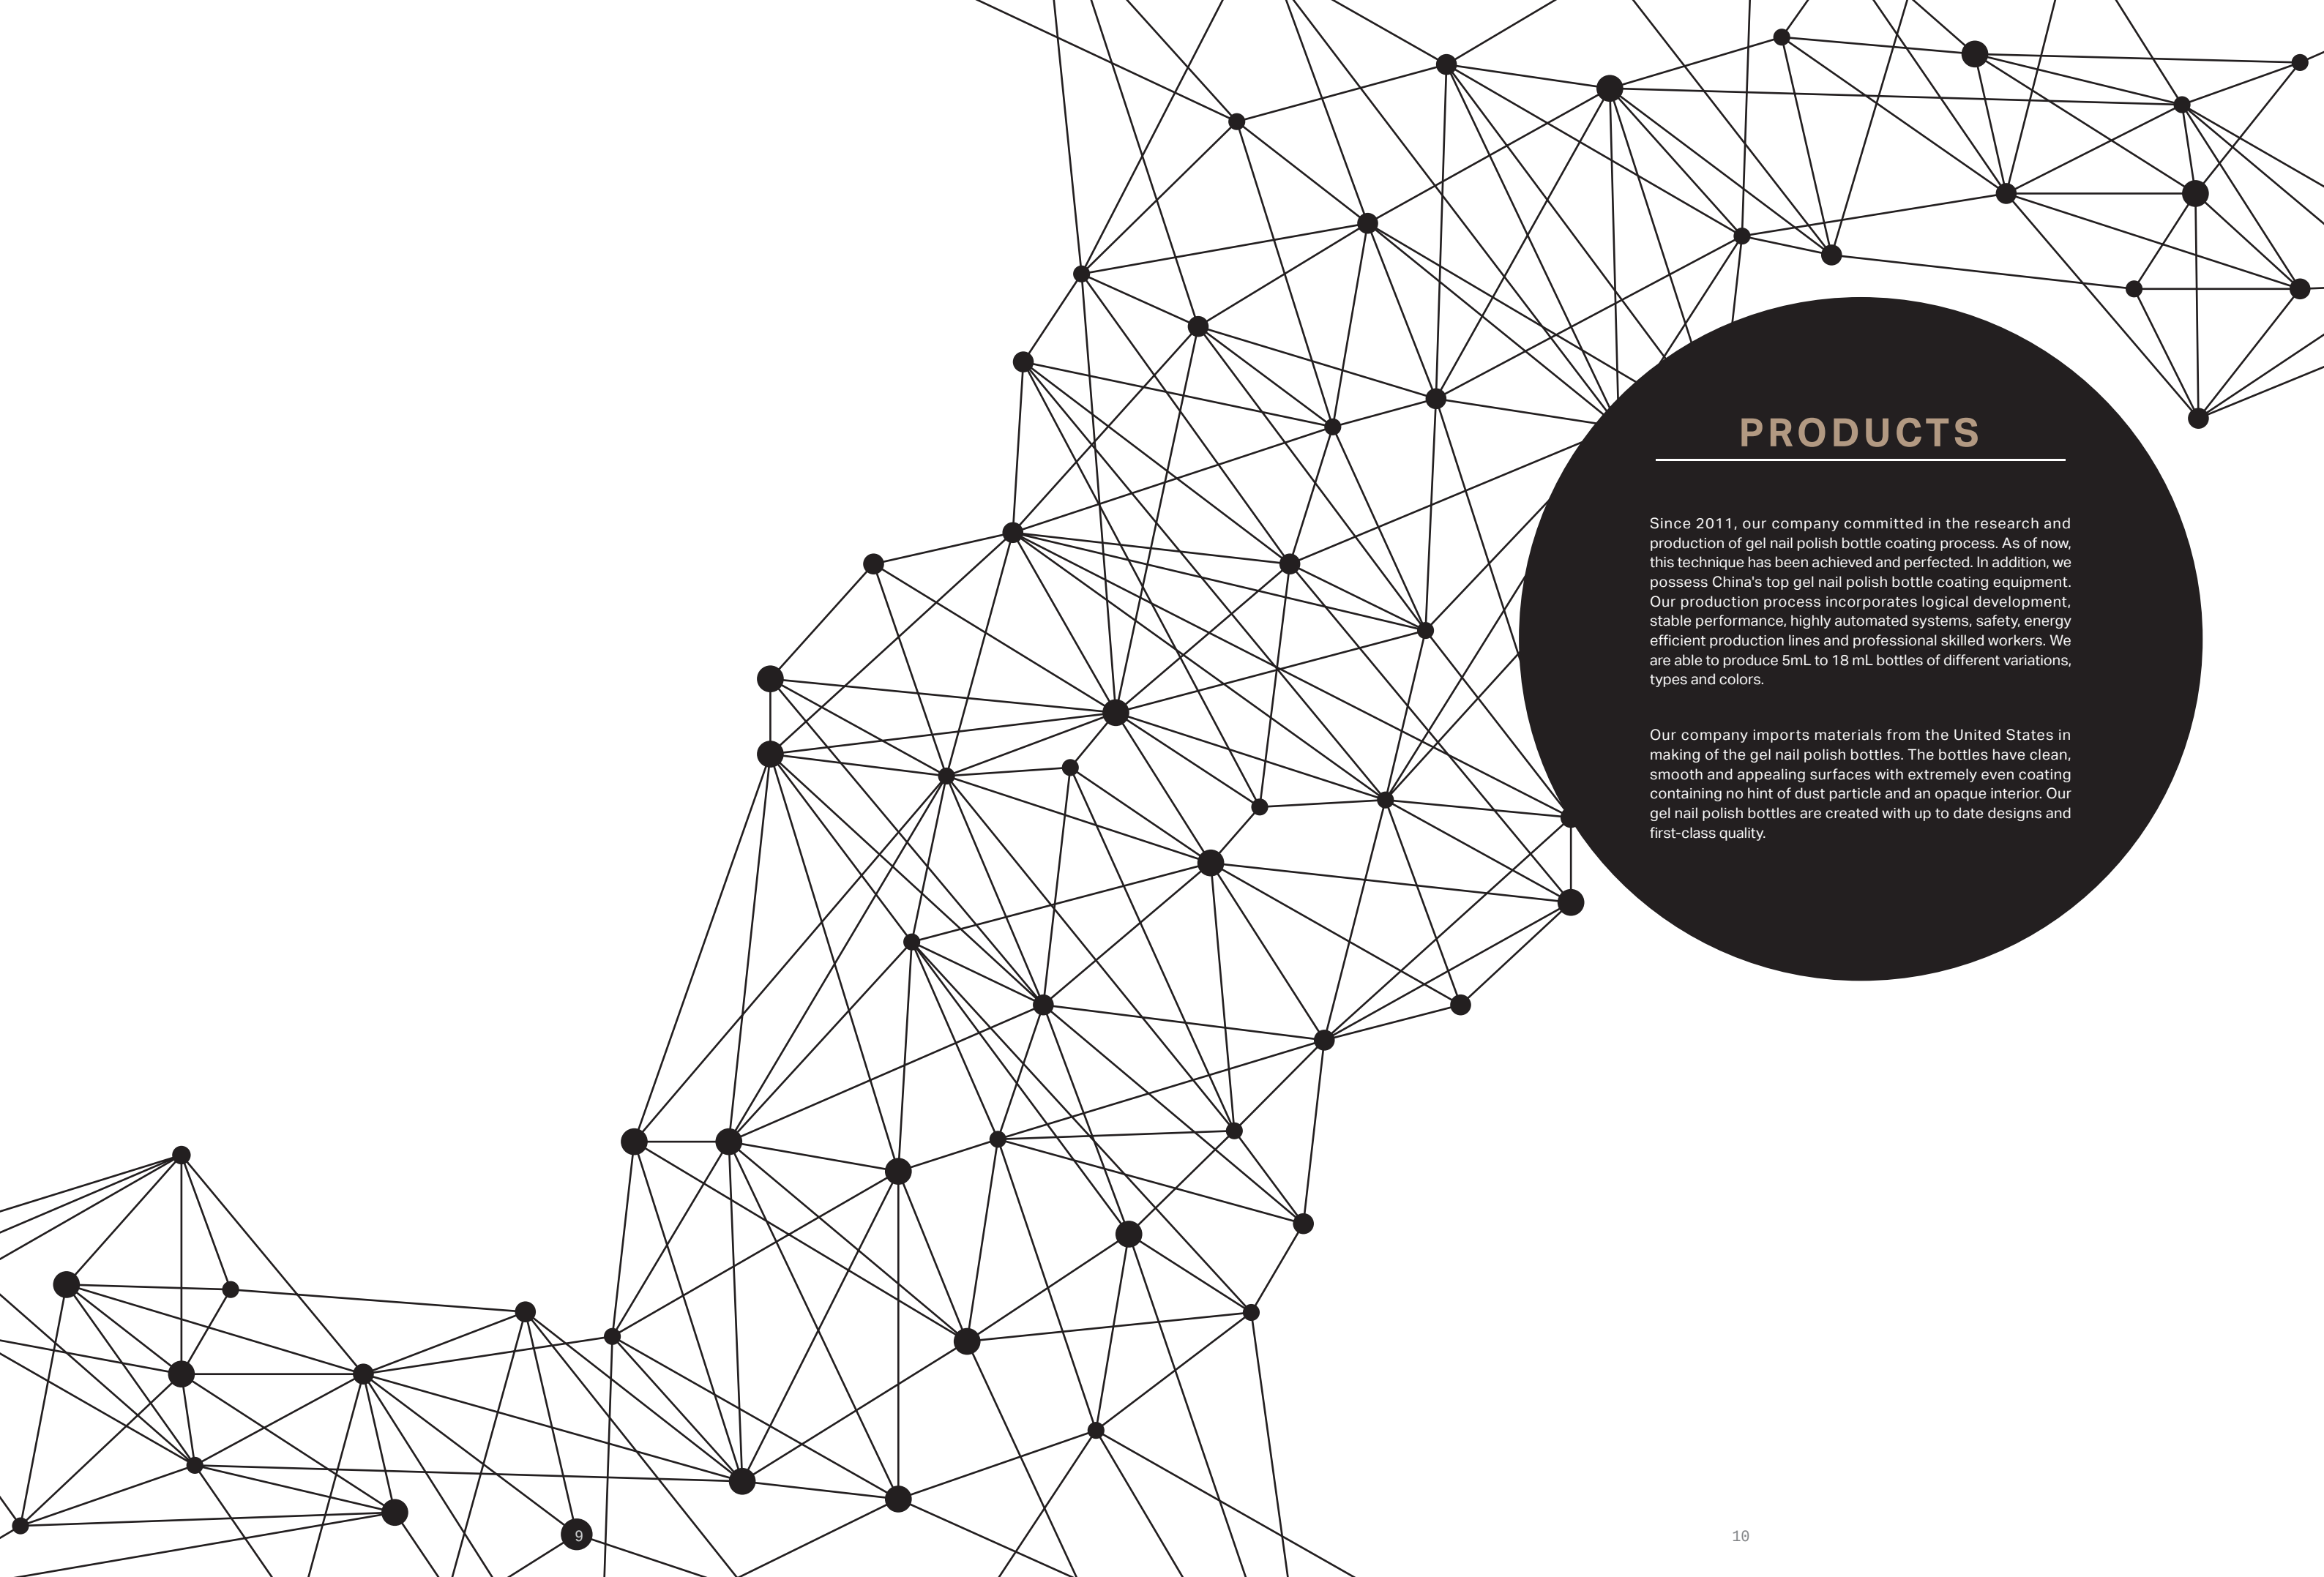

There are 60 specifications of painting brushes. There are different sizes of cap and bottle, different specification of painting brush with the variation of white and yellow colored brush hair.

We have more than 100 kinds of different nail polish brush and molds to meet customer's various interests. The hair is made of DOPUNT filaments from America which are used for making nail polish brushes to assure you of a wonderful feeling while applying nail polish on your fingers tips.

There are two kinds of hair: Lacquer hair and Non-lacquer hair with black or white color. We can make the hair in the sizes of 13~14mm length for nail polish and 9-12mm for gel polish. The

brush tube divides into flat-tube brush and round-tube brush. The brush base size 9 and 11 are matched to the 13 and 15 neck size of the nail polish bottle.

We are capable of offering our customer with integrated service from brush design, mold production and mass production.

PRODUCTS

Since 2011, our company committed in the research and production of gel nail polish bottle coating process. As of now, this technique has been achieved and perfected. In addition, we possess China's top gel nail polish bottle coating equipment. Our production process incorporates logical development, stable performance, highly automated systems, safety, energy efficient production lines and professional skilled workers. We are able to produce 5mL to 18 mL bottles of different variations, types and colors.

Our company imports materials from the United States in making of the gel nail polish bottles. The bottles have clean, smooth and appealing surfaces with extremely even coating containing no hint of dust particle and an opaque interior. Our gel nail polish bottles are created with up to date designs and first-class quality.
